

Find and label the following on the nervous tissue drawing:

axon

axon terminal

axolemma

axoplasm

cell body (neuronal soma)

dendrite

ions that came through ligand gated channel

ligand-gated channel

myelin (sheath)

neuron

neurolemma

neurotransmitter

node of Ranvier

plasma membrane

presynaptic neuron

postsynaptic neuron

Schwann cell (a type of neuroglial cell)

sodium-potassium pump

synapse

synaptic cleft

synaptic end bulb

synaptic vesicle

voltage-gated potassium channel

voltage-gated sodium channel
